WANTED: TECHNICIAN (S) TO INSTALL 50 GALVANIZED STEEL SCREEN HOUSES

Agribusiness Innovation Centre (AIC), a department of PASS Trust, intends to construct 50 screen houses for horticulture production at the SUA-AIC Incubation Centre -Morogoro. The screen houses are part of the expansion plan that is aimed at increasing the Incubators' capacity to incubate a bigger number of youth agribusiness units.

PASS now invites applications from experienced and qualified Tanzanian Technicians to apply for a service of construction of 50 galvanized steel frame screen houses (8x30m) at the SUA-AIC Incubation centre in Morogoro.

The scope of work entails:

- Installation of galvanized steel pipe screen house frame (8X30) with respective accessories including gutters as per technical design
- Installation of covering materials including insect net, greenhouse film and plastic film (skirting)
- Raising plants beds as per specifications/ dimensions respecting crop type farming system
- Installation of drip irrigation system respecting crop planting system/agronomic practices as per design

The applicants should demonstrate their experience of undertaking similar work previously with similar size and frame materials. All applicants will be required to submit proof of their expertise and experience as well as provide details of installation cost of one screen house as per above scope work.

Interested persons can send their expressions of interest to email address md@pass.or.tz to reach us latest 05th August 2020 at 12.00 hrs.
