PROJECT CONSULTANT FOR SCREENHOUSE CONSTRUCTION

Agribusiness Innovation Centre (AIC), a department of PASS Trust, intends to construct screenhouses for horticulture production at the SUA-AIC Incubators in Morogoro. The screenhouses are part of the expansion plan that is aimed at increasing the Incubators' capacity to incubate a bigger number of youth agribusiness units.

Accordingly, a qualified and experienced project consultant is required to oversee the planning and construction of fifty (50) screenhouses at SUA-AIC Incubators by August 2020. This person has to show proficiency in design and construction of screenhouses, and will have undertaken similar projects previously. All applicants will be required to submit proof of their expertise and experience and provide their full cv.

The scope of work entails:

- Determining a suitable design for the screenhouses, based on existing models, best practices and in consultation with AIC team.
- Preparing a detailed BOQ for the Screenhouse design.
- Preparing the ground layout plan for fifty screenhouses including layout for water piping network, and road and rainwater drainage network.
- Preparing tender documents for procurement of materials and construction works.
- Preparing contract documents for suppliers of materials and for builders undertaking the construction works.
- Verifying the materials received at site to be as per specifications and quantities in the BOQ.

- Supervising, monitoring and verifying the contractor to ensure the construction of the screenhouses is as per design specification, of the required standard and is undertaken within time period provided.

Interested consultants can apply by submitting their proposal to md@pass.or.tz latest by 7th June 2020.
